

TINCROFT MINES, LIMITED.

Carn Brea, R.I.O.

Cornwall,

TELEGRAMS: TINCROFT MINES, CARN-BREA.
TELEPHONE: No. 53 REDRUTH.

8th August 1917

Dear Sir,

re Boundary.

Further with regard to our conversation following my letter to your goodself on the 31st ultimo.

It was reported to me Yesterday that your men have again broken through the hanging between the 70 and 80 at a point we were agreed is on the Tincroft side of the boundary.

I am surprised that this should happen, by breaking into our hanging wall this way it makes it almost impossible to mine the ground up to the point your men cease working.

It was with the greatest astonishment, that on visiting the place this morning I found that your men were still at work stoping, roughly 10 to 12 ft in Tincroft Mine, and I find have been regularly at work here since my letter of the 31st ultimo.

Not only so if as we are agreed, the Stuff broken at the time referred to was evidently Tincroft Ore, ~~which~~ is a sufficient reason for your men to let it remain, but I understand a large quantity has already been trammed.

(2).

continuation.

I beg to request, pending our Meeting on the spot, that all work should be discontinued at the point in question and a valuation or exchange, as suggested, arrived at.

The Ore as far as mined by us, is of moderate value for Tin and Wolfram, but rich in Arsenic, which at ruling prices makes it a very desirable product, in some instances several pounds sterling per ton.

I shall be glad to hear from you that the removal of any further Ore remain in abeyance.

Yours faithfully,

W. Thomas
Manager.

P. S.

I tried to get you on the 'phone Yesterday, but it was out of order. On calling at your Office, you were not available.
