Captain J. Paull,  
South Crofty Mine,  
Carn Brea, R.S.O., Cornwall.

Dear Captain Paull,

I am sending you a sample of Galidna Sands from which we have got some very curious results by vanning, and chemical assay. I should take it as a great favor if you would get your vanner to test it, and at the same time have your chemist make a wet assay for tin.

I shall, of course, be very pleased to pay any charges in connection therewith.

With kind regards,

Yours sincerely,

*Henry W Lake*
